A Heritage of Innovation

ELANTAS PDG, Inc. was founded in November 1919 in St. Louis, Missouri as The P.D. George Company by Pericles Demetrius "P.D." George.

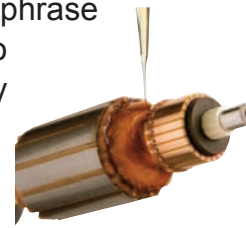

The initial focus of the company was creating resin products for the paint and coatings industry, but we have been a supplier of resins for electrical insulation since the beginnings of that industry in the 1920s.

Today we are the premier global supplier of specialty polymers for the electrical and electronic industries.

Electrical Insulation Products For Every Application

P.D. George himself coined the phrase "The Product with a Pedigree" to describe the superior technology employed in his products. That attitude continues throughout the company today.

We offer our customers the broadest range of products for electrical insulation. We manufacture wire enamels, impregnating resins (varnishes), potting compounds and casting resins for motor, transformer, generator, and other electrical and electronic applications.

A Member of ALTANA's ELANTAS Electrical Insulation Division

Our company grew both organically and through acquisitions until 1996 when we were purchased by ALTANA AG, a specialty chemical company headquartered in Wesel Germany, and we became part of ALTANA's Electrical Insulation Division.

In 2007 the Division was renamed to ELANTAS Electrical Insulation and the St. Louis site became known as ELANTAS PDG.

Our parent company has continued our history of strategic growth through acquisition and investment in organic projects.

Today ALTANA and the ELANTAS Electrical Insulation division are market leaders in the markets we serve.

| Sterling® Leader in High Voltage Motor Resins | ELAN-Safe® Environmentally Friendly Waterborne Resins |

ELANTAS PDG's Blending Building is ALTANA's largest capital investment in the ELANTAS Electrical Insulation Division.

A State-of-the-Art Production Facility

ELANTAS PDG, Inc. has been located on our current 20 acre site in St. Louis, Missouri since 1935. Our site accommodates the largest capacity for reacted synthetic resins and specialty blends in the electrical insulation industry.

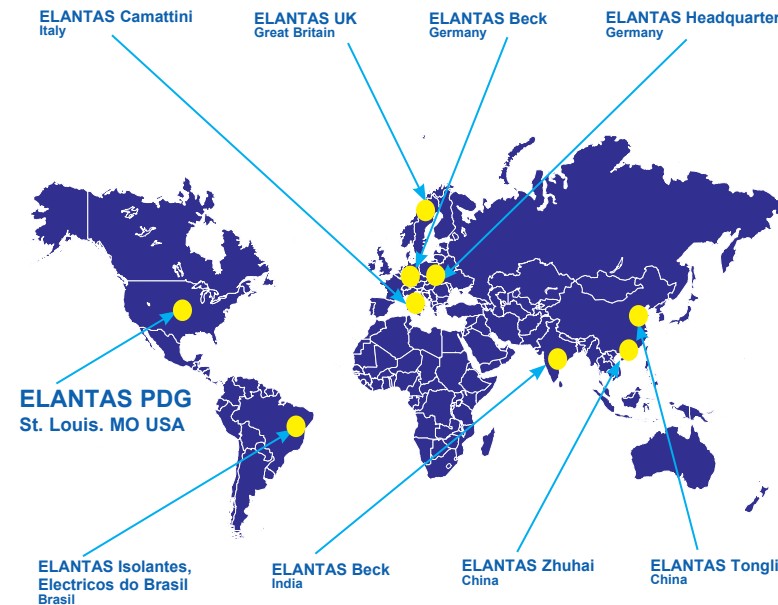

Our parent company, ALTANA AG, continues to invest to make ELANTAS PDG a world class manufacturing facility.

The most recent addition is our state of the art blending facility. This new building, dedicated in October of 2008, allows us to manufacture a wide variety of blended products to meet the needs of our customers.

Serving Customers Around the World

Our focus on providing the best technology and the ability serve customers around the globe is the key to our success.

Being part of the ELANTAS Electrical Insulation Division has given us access to technology, innovation and best practices from around the globe. It has also allowed us to transfer technology to our sister companies around the world in order to service our global customers.

Our Commitment to Guiding Principles

Everyone at ELANTAS PDG, Inc. is committed to our four Guiding Principles:

Safety, Service, Innovation, and Quality

We strive every day to exceed our customers' expectations while maintaining the highest level of safety for our employees and protection for our environment.

Whether service to our customers which we measure through our on time shipments or service to the community through blood drives and other volunteerism we take our responsibilities to these Guiding Principles seriously.

ELANTAS PDG, Inc.

ELANTAS Electrical Insulation

Around the world, ELANTAS Electrical Insulation companies are respected as market leaders in the development and manufacturing of impregnating resins (varnishes), wire enamel, potting compounds and casting resins for a number of electrical, industrial, aerospace and civil applications. No matter what your challenge, be assured that ELANTAS Electrical Insulation products will meet your most demanding needs.

ELANTAS PDG, Inc.

Today, ELANTAS PDG, Inc. is recognized as the premier global supplier of specialty polymers for the electrical and electronic industries. ELANTAS PDG, Inc. is a member of ALTANA's ELANTAS Electrical Insulation Division based in Wesel, Germany.

With the support of ALTANA and by working with other ALTANA divisions, we offer a unique global approach to research, manufacturing and service that translates into more creative solutions, dependable supply and consistently high quality.

Many ELANTAS PDG, Inc. products are recognized as components of electrical insulation systems in accordance with UL 1446. ELANTAS PDG, Inc. is registered to ISO 9001:2000 and ISO/TS 16949:2002- Second Edition.
